F-One Trax 5 2010

\$ 1'190

F-One Trax 5:

Since its creation, the TRAX has always been F-ONE most technologically advanced board. For 2010, we have focused on the twist and flex control using a 3D carbon fiber. Control was born. The TRAX5 does all the work for you as it also absorbs all vibrations instead of passing it on your legs. It has an unbelievable directional stability and an astonishing precision when edging. Its 3D bottom shape, composed of a double concave shape, lateral V and channels makes the TRAX5 our fastest board. It also allows us to use a higher scoop for greater comfort and carving. The TRAX5 is a successful mix of technology and performance. It combines the speed and precision one can expect from any top of the line board. The TRAX5 is made for all those riders who need a competitive board for freestyle, riding in any conditions and great pop to launch big airs.

132/38, 134/39, 136/40, 138/41
